ABOUT ME

I am 22 years old and for almost a year my passion has been creating websites. I am a self-taught person who gained his knowledge through courses on platforms such as Udemy. I consider myself a committed and hard-working person, and working in a team is not a problem for me. Currently I'm studying International Relations at the University of Wrocław. This is my last semester of bachelor studies, after graduation I will start my master's studies at the University of Applied Informatics where I will be able to expand my knowledge of programming, which I can't wait for. I decided to get into programming for a simple reason - it's something I love and it gives me great satisfaction.
