Oct 2023 - Present
Master's degree in computer science
Wrocław, Poland

University of Wrocław

Oct 2020 - Jul 2023
Bachelor's degree in international relations
Wrocław, Poland

Summary

A student at the Academy of Computer Science and Technology (ATINS) in Wroclaw. I turned my passion for programming into a professional activity, founding a company in early 2024. I am engaged in creating modern and professional websites for clients. I am passionate about developing my skills and expanding my knowledge of new technologies. I want to work on larger projects, constantly gaining new experience and skills. In my free time I love skiing

Projects

1. Moviecine (imdb clone)

Links: Live Demo • Github Repository

Recruiter login:
Username: admin@moviecine.pl   **Password:** Admin2024

Main technologies:
Next.js   Typescript   TailwindCSS   Appwrite   ZOD
React Hook Form

Project goal:
Learning how to create a web app in Next.js using an external TMDB API with lots of data to optimize

Key features:
- Using the backend as a service (Appwrite)
- Integration with external TMDB API
- Optimization with SSR and Server Actions
- Custom Next.js API Routes for data management

2. Splitsy (budget app)

Links:
Live Demo • Github Repository

Recruiter login:
Username: admin@splitsy.pl   **Password:** Admin2024

Main technologies:
React.js   Typescript   TailwindCSS   Tanstack (React) Query
Firebase   ZOD   React Hook Form

Project goal:
Building a modern and responsive web application to manage household budgets effectively, focusing on tracking expenses, incomes, and savings. The project also aimed to learn React Query (TanStack) for efficient data fetching and state management.

SKILLS

- JavaScript, Typescript
- React.js, Next.js
- HTML5, CSS3, SASS
- TailwindCSS, Bootstrap
- ZOD, React Hook Form
- Appwrite, Firebase
- MongoDB, Shadcn/iu
- Tanstack Query
- Git, REST API
- Figma, Wordpress

Languages

- **Polish** - Native
- **English** - B2

Key features:

- Real-time transaction tracking with detailed descriptions and categories
- Integration with Firebase for backend services and data storage
- Custom savings goals with progress visualization
- Personalized financial reports using line, bar, and pie charts
- Responsive design optimized with TailwindCSS for all devices

3. Mernstore (e-commerce platform)

Links:

Live Demo ● Github (frontend) ● Github (backend)

Recruiter login:

Username: admin@mernstore.pl   **Password:** Admin2024

Main technologies:

React   Typescript   Sass   MongoDB   Express.js   Stripe

Project goal:

To learn how to create a full-stack e-commerce website by integrating both frontend and backend

Key features:

- Simulate payments with stripe
- User authentication using access tokens in cookies
- Cart and wishlist state information is stored in localStorage for easy access and persistence across sessions
